### ABSTRACT

Vocabulary is an important thing in English. Therefore, at university vocabulary is a compulsory subject for English language study program. Students cannot speak, write, listen, and read the reading texts when they do not have enough vocabulary to understand the reading texts. Thus, students should master vocabulary. The purpose of this research is to know students' problems in vocabulary mastery. This research is a descriptive research. The population of the research is students of education faculty of UPI YPTK Padang in 2018/2019 academic year. The sample of the research is students of English education language study program. The data were collected by using questionnaire. Questionnaire is given to know students' reasons and problems in mastery vocabulary. The result of the questionnaire proved that students have different opinions about their ability in mastery vocabulary.

**Keywords:** mastery, problems, vocabulary

### INTRODUCTION

English is a subject at university. The purpose of English at university is not only to give skill to the students, but also to help students to find or to get a job after they graduated later. Since English is an international language. Skill of English is very important for the students because they are as academic person needs more knowledge to face globalization era. English has any important parts. They are skills and language components of English. Skills of English are speaking, reading, writing and listening. Language components of English are vocabulary, grammar, pronunciation and spelling. Between skills and language components are supported each other. They also cannot be separated each other.

One of language components are vocabulary. Vocabulary is a key of English. Someone cannot speak, write, listen and read if she/ he does not have vocabulary. In vocabulary class, students learn vocabularies of English. They give many vocabularies of sports, school objects, household objects, part of plants, tree, volume, etc. The purpose is to make the students can use the vocabularies in their daily life, since vocabularies is an important thing in communication. As stated by Moeller et al (2009: 2) vocabulary is central to the learning of foreign language includes literature, music and content knowledge.

At university especially for English study program, vocabulary is a compulsory subject. But, based on writer preliminary observation, at UPI YPTK Padang students still have low ability in vocabulary. Students will not understand the text if they do not have vocabulary. Students also cannot speak if they do not have vocabulary. Moreover, the fact in the classroom showed that students still have problems and difficulties in identifying the vocabularies. They still doubt in identifying which one of adverb, verb, adjective and noun.

In learning vocabulary, students are still confused which one is adverb. For example students are still difficult to know whether "good" is included to adjective or to adverb. Moreover, students also had problems in adjective. They are not only difficult to identify the category of vocabulary but also difficult to make the adjective in form of comparison. For example to state something is more than other, it needs comparison. So the adjective will be add -er or more. In addition, some students also had difficulties in verb. They cannot know the regular or irregular verb. Moreover, students sometimes use dictionary directly to know the meaning of new vocabulary. Actually it is not allowed to searched the meaning directly, students should guess the meaning first. Then, students' problem related to pronunciation of the words. English has different pronunciation to the written form. Therefore, students have difficulties to catch the meaning of the vocabulary. After that, students still have problem related to grammar. For example the comparison degree of adjective, tenses and passive voice. Therefore, based on these phenomena, researcher

wants to conduct a research entitled an analysis of students' problems in vocabulary mastery at English study program at UPI YPTK Padang in 2018/2019 academic year.

There are some definitions of vocabulary. Faraj (2015: 10) says that vocabulary is an essential building block of language and as such it makes sense to be able to measure learners' knowledge of it. Therefore vocabulary is one of the most pivotal components of language learning and teaching of a foreign language since it affords learner of the language access to all forms of oral and written communication of word. Moreover, Alqahtani in Cameron (2001) defines that vocabulary as one of the knowledge areas in language, plays a great role for learners in acquiring a language. In line to Alqahtani, Nagy (1997) argues that vocabulary knowledge is fundamental to comprehending text. Hudson (2007) defines that vocabulary knowledge is a key element to better reading comprehension. Next, Chou in Andriani (2019:16) says that vocabulary is a key point in understanding text. Then, Nation (1990) defines that vocabulary plays a great role predictor of overall reading ability.

Vocabulary learning plays an important role in foreign language learning, both in the first language and second language. According to Kamil and Heibert in Ahmadi et al (2005: 187) vocabulary is as knowledge of words or word meaning. Moreover, Ling et al (2012: 55) also suggest that the vocabulary also should introduce from the simple to the complex one. They also suggest that to the author to make the meaning of the vocabulary can be guessed by the students without look dictionary. So, students get new vocabularies during the learning. The text should allow students to make inference, apply what they read in their real life, identify meaning of unknown words from the context, replace difficult words with the simpler words and new words are repeated for reinforcement.

Vocabulary is central to English language teaching because without sufficient vocabulary students cannot understand other or express their own ideas. Wilkins (1972) states that while without grammar very little can be conveyed, without vocabulary nothing can be conveyed. Moreover Albeit in Faraj (2015: 11) defines that vocabulary is not the only element that convey meaning, but also there are some other vital feature like grammar, intonation, stress, tone of voice, rhythm, pauses, silences or hesitations, etc. McCathy (1990) argues that no matter how well the students learns grammar, no matter how successful the sounds of second language are mastered, without words to express a wide range of meanings, communication in a second language just cannot happen in any meaningful way. It can be concluded that vocabulary is a very important part of language. Especially for teaching and learning process, vocabulary plays an important role. Therefore, students should be master as many as possible vocabularies.

Vocabulary is one of the difficult subjects and students have problems in mastery vocabulary because vocabulary skill includes some aspects. According to Cameron (2001: 78) vocabulary skill included: pronunciation, spelling, grammar and meaning.

#### 1. Pronunciation

Pronunciation is one of the aspects that have a great influence of vocabulary. Pronunciation is the way in which a particular person pronounces the word of a language. Students need to listen a new word in foreign language in order they can notice the sound at the beginning and at the end, the stress patterns of the word. There is different pronunciation between English and Indonesian vocabularies. Every language has special phoneme, English has different sound with Indonesia/ Malaysia sound. Therefore, students have problems in pronunciation. The students have difficulties for some reasons. The first reason is that some sounds of English do not exist in Indonesia. The phoneme /o/ (thin) and /θ/ (this) are found, it is not found in Indonesia. Therefore, in learning pronunciation, one must learn or not only to form sound correctly but also to use them in the correctly place.

#### 2. Spelling

Students need to know the letters and syllables that make up the word that is called spelling. Spelling is the act of forming words correctly from individual letter or the way that a word is spelt. Sound-spelling mismatches are likely to be the cause of errors; either of pronunciation or of spelling and can contributes to a word's difficulty. While most of English spelling is fairly law-abiding, there are also some glaring irregularities.

3. Grammar

Also problematic is the grammar associated with the word, especially if this differs from mother language equivalent. Remembering whether a verb *enjoy*, *love*, or *hope* is followed by an infinite (to swim) or an -ing form (swimming) can add to is difficulty.

4. Meaning

When two words overlap in meaning, learners are likely to confuse them. *Make* and *do* are a case in point.

5. Range, condition and idiomaticity

## METHODS

The method of this research is a descriptive research. Gay and Airasian (2000) state that descriptive research determines and reports the ways thing are. It is told about something occurs in the field. Further, Gay and Airasian also add there are two reasons why people use the descriptive method. First, a high percentage of reported research studies are descriptive in nature. Second, the descriptive method is useful for investigating a variety of educational problems. Since it is a descriptive research, the data will be collected through test, interview and observation. This research was at English study program of UPI YPTK Padang. The location is on Jalan Lubuk Begalung Padang, Sumatera Barat province. The research was taken at second semester on 2018/2019 academic year.

This research used descriptive method. This research described the object of the research and described them systematically and accurately. In this research, the population is total number of students of English study program of UPI YPTK Padang. This statement means that sample is part of individual members which is chosen to represent of the whole population. In this research, the sample is students of English language study program of UPI YPTK Padang. The sampling used is total sampling.

The technique of data collection is through questionnaire. Questionnaire has forms such as multiple choice item and Likert Scale. A likert scale ask participant to respond a series of statement, they were strongly agree (SA), agree (A), undecided (U), disagree (D) or strongly disagree (SD) with each statement. The instrument consists of several items that express students' mastery of vocabulary. The score of questionnaire will give based on the type of each item. The score arranged: SA=5, A= 4, U=3, D=2, SD=1.

## FINDINGS

Based on the data analysis, the scores of questionnaire are can be seen in the following explanation.

1. Grammar

The result of questionnaire shows the indicator grammar as in the following table:

**Table 1. Result of Questionnaire in Grammar**

Score interval	Category	Frequency	Percentage
≥33	Strongly Agree	2	2.94
27-32	Agree	16	41.18
21-26	Undecided	16	52.94
15-20	Disagree	0	2.94
≤14	Strongly disagree	0	0
Total		34	100

The table shows students' problem in mastery vocabulary in indicator grammar is categorized good enough. This is because students still have problems in categorizing the words. For example statement of the questionnaire 'I am able to mastery vocabulary especially adjective'. In this statement, students gave agree respond. But in test, students have a little bit difficulties in

comparison degree of adjective. Students still doubt to add –er after the adjective or using more. Actually it can be solved, when they have study hard and do more practice.

Then, statement related to grammar is ‘I can mastery the past form such as go-went-gone. Students gave agree respond toward this statement. It means that students did not have problem related to the past tense. But sometimes students still doubt when they faced questions. The result of the test showed that students have good ability in past tense. Only little student who could not make different about past tense. It is showed by the result of the test, students could answer the questions. But there are some students who still have mistake about this one.

## 2. Pronunciation

**Table 2. Result of Questionnaire in Pronunciation**

Score interval	Category	Frequency	Percentage
≥19	Strongly agree	6	2.94
15-18	Agree	17	41.18
11-14	Undecided	9	52.94
7-10	Disagree	2	2.94
≤6	Strongly disagree	0	0
Total		34	100

From the questionnaire, it can be known that student’s problems in mastery vocabulary also influenced by pronunciation. Pronunciation of a word in English is different to the written form of the word. Students gave respond agree toward the statement about pronunciation. For example the statement ‘I am difficult to understand and to make differences between vocabularies such as wise, wish, twist and twist. So, it showed that the students do not have problem related to pronunciation.

## 3. Spelling

**Table 3. Result of Questionnaire in Spelling**

Score interval	Category	Frequency	Percentage
≥22	Strongly agree	1	2.94
18-21	Agree	14	41.18
14-17	Undecided	18	52.94
10-13	Disagree	1	2.94
≤9	Strongly disagree	0	0
Total		34	100

From the table, it can be known that students’ problem in vocabulary also influenced by spelling. It can be known from their respond when they ask to spell vocabularies from the unarranged letters. Actually to spell, English vocabulary correctly is more difficult than in Indonesian. Thus, English vocabularies have different pronunciation to the written form. It is a point that make learners are difficult for spelling new words when they listen it.

## DISCUSSION

From the findings, it can be seen that in spelling aspect, students are asked to spell the vocabulary correctly. In meaning, students are asked to match the vocabularies. Some students still have problems in defining the meaning of new vocabularies. It means that they still have difficulties in mastery vocabularies. They are difficult in finding the definition of new vocabularies. Matching the words to the synonyms are categorized an easy activity to recognizing meaning of vocabulary. Students have a nice activity when they do matching the words to the synonyms. Students can do this activity well. They can match the words to the synonyms correctly. Then, students also arrange the unarranged letters to be a new vocabulary. They also can do this activity. The students can find as many as possible vocabularies from the unarranged words. For instance the letters are: c-a-p-o-m-n-y. The students can make vocabularies from the unarranged letters are: can, camp, nap, pan, man, map, any, a, an, may, no, pay.

From the questionnaire, it can be known that student's problems in mastery vocabulary also influenced by pronunciation. Pronunciation of a word in English is different to the written form of the word. Students gave respond agree toward the statement about pronunciation. For example the statement 'I am difficult to understand and to make differences between vocabularies such as wise, wish, twist and twist. So, it showed that the students do not have problem related to pronunciation.

The factors that influenced students' mastery of vocabulary are outside and inside factors. The outside factor is such as environment. For example environment does not support students to study or to practice. Students do not have friends or family that they can share of talk to them. So, students do not have place to share their ideas. Then, the inside factor is such as practice or personality of the students. They are brave or not to speak or practice in front of many people. Then, other inside factor is ashamed. Students sometimes fell ashamed to speak.

## CONCLUSION

From the questionnaire, it can be concluded that students' problems in mastery vocabulary are related to grammar, pronunciation, meaning and spelling. In pronunciation, this is because the sometimes the vocabularies that are pronounced different to the written form. In grammar aspect, students have problem in using verb two forms or past tense. Therefore, to increase students' vocabulary mastery, it needs more exercises.
